PROJECTS / OPEN-SOURCE

MY_KART | [LINK](#)

Javascript, Firebase, React.js, Tailwind CSS

This website is a basic prototype of an e-commerce website that allows users to explore various available products and assemble them in their cart.

- React JS allows the smooth rendering and functioning of the website. Firebase realtime database is used to store the data of contact form. The use of Tailwind CSS makes the design appealing and attractive.
- The ultimate goal of the project is to provide the users one stop shop for all their shopping needs.

THE_KHABRI | [LINK](#)

Javascript, React.js, Tailwind CSS

- The web application software The khabri provides its readers the insights of the happenings around the globe to be aware. A phenomenal API provides the users category-wise news that allows readers to read the news of their interest.
- React JS allows smooth rendering and fetching of the data. Tailwind CSS makes the website fully responsive and mobile friendly too.
- Overall goal of the project is to make awareness about the world happenings to all with ease of technology.
